- Python
- Mongo DB
- Express
- PostgreSQL
- Flask

### Soft Skills

---

- Leadership
- Teamwork
- Communication
- Adaptability
- Customer Service

### Education

---

- General Assembly London  
Software Engineering Immersive  
Completed in 2022
- Easton College  
HND in 3D Design  
Completed in 2007

### About Me

---

I'm a junior software engineer from London. I delved into coding as a hobby, which soon blossomed into a full-blown obsession. There I refined my technical skills and cleared the way for my transition into the world of software development.

I thrive on challenges and pride myself on being disciplined, whether collaborating within a team or working alone. My background in the healthcare industry has equipped me with the resilience and adaptability needed to thrive even in high-pressure environments.

The process of solving coding problems is incredibly rewarding for me. I'm driven by a relentless curiosity and am always eager to explore new avenues in this field. I'm eager for the journey ahead! There's so much to learn and explore in the world of software engineering, and I'm ready to dive in headfirst.

### Projects

---

Evergreen - Solo - 1 month

Plants store. A simple React e-commerce app.

Link: <https://evergreen-houseplants.netlify.app>

Anime Cue - Solo - 2 weeks

A place for anime lovers to connect and share their views about different anime films. Python, Flask, and PostgreSQL

Link: <https://anime-cue.netlify.app>

2013- 2019

Key responsibilities:

- Reception and admin work
- Led a team of nurses
- Provided advice to patients
- Prepared and maintained the clinical environment
- Constructed and made dental appliances

## Interests

---

Diet and Health

I firmly believe that our well-being, both physical and mental, is closely tied to what we eat. I'm fascinated by how lifestyle, diet, and health are interconnected.

Food

I have an intense passion for food, both the act of eating and the creative process of cooking. I love trying out different ingredients and creating my own recipes, always making them better and trying new things.

Painting

Painting serves as a form of meditation for me. It boosts my confidence, helps me forget worries, and the best part is that there are no rules—I can just be myself.

## Languages

---
